Pupil  
Worksheet

**Year 4**

# The Investigation

To find out if a liquid evaporates at different rates due to different factors

01

## What you think you might find out?

(Write down what you think you might find out from this investigation)

---

---

---

---

---

---

---

---

02

## How we did the investigation

(for example - using water, a measuring cylinder, beaker, saucepan and a large tray, explain how you would do the investigation)

---

---

---

---

---

---

---

---

03

### How we ensured that the investigation was a fair test

---

---

---

---

---

---

---

---

---

---

04

### The Results

Container the water was put in	Time taken for the water to evaporate

05

**Conclusion**

(write a conclusion for the investigation explaining what you have discovered)

---

---

---

---

---

---

---

---

---

---

06

**Do different liquids all evaporate at the same rate?**

(Write if you think different liquids evaporate at the same rate or different rates and try to give some examples to support what you think)

---

---

---

---

---

---

---

---

---

---
