Answer
Sheet

Year 5

The Investigation

To find out if there is a pattern between the height you drop a rubber ball and the height that it bounces.

01

What you think you might find out?

(Write down what you think you might find out from this investigation)

02

How we did the investigation

(write a short piece explaining how you would do the investigation. Is there a way to use technology to help measure?)

03

The Results

Height that the ball was dropped from	Height that the ball bounced
90 cm	72 cm
70 cm	59 cm
45 cm	34 cm
13 cm	11 cm

04

Conclusion

(write a conclusion for the investigation explaining what you have discovered)
