## Y4 SCIENCE INVESTIGATION

To find out what animals live in the school grounds.

---

What we want to find out

We want to find out what types of animal live in the school grounds and where they are found.

Try to think how we can find out.

Talk with your friends and see if you can come up with an idea.

Tell the rest of the class your idea for your investigation and decide who in the class has the best idea.

---

Make a prediction

I think we will find the most  
animals:

---

## **DOING THE EXPERIMENT**

---

Explore the school site to find any animals that might be living there.

---

Photograph the animals and note the position. Do not touch the animals.

---

Download the photos, enlarge them and identify the animals.

---

Make a classroom display showing where the animals were found.

---

Try and identify the different habitats for the different animals.

# Minibeast Search

---

Why should we not remove the animals from where they live?

# Minibeast Search

---

## WHAT NOW?

Try and identify the habitat factors required by different types of animal.
